

A commitment to excellence in all we do

ECMS is committed to providing consistent best-practice and high-quality educational experiences throughout your child's time in our centre. We all benefit when we invest in quality early learning programs that help all children to be healthy, get a good education and contribute to our collective prosperity.

Quality educators

ECMS believes early childhood education is the most important job in the world. We also believe qualified educators are essential across all ages from zero to five.

All ECMS educators are qualified and undertake extensive professional development every year so they can continue to build their practice, skills and experience.

Quality programs

Our educators will design your child's learning program around their unique learning needs. Educators will structure the early learning program to maximise your child's opportunities and experiences to explore, grow, participate and learn.

Each of our early learning programs is responsive to its local environments. This will enable your child to understand a sense of place and culture in their immediate world.

The assessment and ratings process

The Australian Childhood Education and Care Quality Authority (ACECQA) regulates all early childhood programs to ensure they meet a national standard. Our early learning programs outshine both state and national benchmarks

for Meeting and Exceeding National Quality Standards.

All ECMS services have undergone at least one rating and assessment in the last three years. You can talk to your educator about your centre's rating and their plans for continuous improvement.

To find out more you can also visit Starting Blocks, a great website with free information for families from ACECQA;
<http://www.startingblocks.gov.au/>

Quality environments

Your child's learning environments will be engaging and inviting. They will feature natural, sustainable and quality equipment for experimentation and play and will change regularly.

All our services operate an indoor, outdoor curriculum throughout the year so children have choices about where to play. Some of our services run bush kindergartens.

Outdoor play enables children to understand their world through weather, planting, flora and fauna. It allows children to explore their environment and understand their place and impact on their surroundings.
